Please remember to cover your windows from light for the sake of the birds.

South Georgia Biosecurity Self Audit Check list & Landing Declaration for all Visitors:

Please turn the page.

Invasive animal and plant species pose a very real threat to South Georgia's fragile environment. By complying with the simple measures below you will personally be making a real and valuable contribution to the conservation of the island.

The biosecurity measures designed by South Georgia Government are intended to protect the island by preventing the introduction or transfer between sites of any organic material including animals, plants, seeds, soil and diseases.

Please study carefully the following points.

1. Have you scrubbed all of your footwear in the boot washing station on board your vessel, removing all soil and organic material?

especially cuffs, Velcro, pockets, seams and hoods?

Is all your equipment and luggage clean and free of soil and seeds? This includes walking sticks, ski poles and tripods for cameras.

Have you emptied, vacuumed and inspected inside any bags that you plan to take ashore, to ensure absence of soil, seeds and insects?

Have you removed all fresh produce, especially poultry products*, from any bags or garments that you intend to take ashore?
(* In order to prevent the introduction of avian diseases)

Have you seen anything which causes you concern? If so, please speak to your Expedition Leader or Officer in charge, who can raise it directly with the Government of South Georgia if necessary.

Government of South Georgia and the South Sandwich Island

We would like to inform you that all stated times and activities are changeable due to weather conditions, or other circumstances out of our control. We kindly remind you to take care walking around on the ship while at sea. Especially venturing out on deck, mind the signs for warning of wet and slippery. Be aware the doors toward the outer decks on 4, 5, 7 and 8 can be potentially dangerous in windy conditions. While walking inside, hold on to railings but not in door frames.

Have you inspected all of your clothing for soil, seeds and insects,

Do you understand that you need to repeat the biosecurity self check procedure before landing at each new site?
