LANDING CAPE HORN	
Time (approximate start time)	Boat Group
10:30	4. Magellanic
	5. Weddell Seal
	6. Snow Petrel
	1. Gentoo
	2. Chinstrap
	3. Adelie
12:30	10. Leopard Seal
	11. Krill
	12. Condor
	7. Black Browed Albatross
	8. Wandering Albatross
	9. Cape Petrel

I, the albatross that awaits at the end of the world...

I am the forgotten soul of the sailors lost,  
rounding Cape Horn from all the seas of the world.

But die they did not in the fierce waves,  
for today towards eternity, in my wings they soar,  
in the last crevice of the Antarctic winds. – Sara Vial

One of the greatest graveyards for ships anywhere, crossing Cape Horn is a rite of passage for sailors the world over. Cape Horn was discovered in January 1616 by Dutchmen Jakob Le Maire and Willem Schouten, sailing in the Unity. They named the cape for their ship Hoorn, which had accidentally burned at Puerto Deseado on the Patagonian coast. Horn Island, of which the famous cape forms the southernmost headland, is just eight kilometres (5 miles) long. The cape itself rises to 424 meters with striking black cliffs on its upper parts. A monument in the form of a large relief sculpture depicts an albatross in flight. It commemorates those lost at sea. A poem by Sara Vial is engraved on a metal plaque nearby.

(see above)

We kindly remind you to take care walking around on the ship while at sea. Especially venturing out on deck, mind the signs for warning of wet and slippery. Be aware the doors towards the outer decks on 6 and 9 can be potentially dangerous in windy conditions. While walking inside hold on to railings, but not in the door frames. When ashore if you hear the ships alarm then return to the landing site immediately.
